Dear Mr. Ramoo Bhadoriya,

This has reference to your interview on last Monday, 21st September 2020. We are pleased to offer you the position of Trainee in our organization for a period of 6 months. You will be trained for handling analytical instruments like HPLC and Preparative HPLC. You will also get training in conducting research in organic synthesis. You will have to carry out reactions to prepare organic compounds. You will be given on the job training by the in-charge of the Laboratory. We expect you to use this opportunity to your best to learn the skills of the techniques in analytical chemistry and synthetic chemistry.

You will perform the work taking safety precautions so that your health as well as your colleagues is not affected.

Your training performance will be evaluated every 3 months. On the successful completion of the training for 6 months you will be absorbed in our regular employment. During the period of your training you will be provided with the stipend of Rs.10,000/pm during training period.

You can reply to this offer by WhatsApp message or an email and join at your earliest. If you have any questions and wish to know more about the job you can discuss with me.
